

«BLOW UP»

On September 26, Erarta Museum and Galleries of Contemporary Art will open «BLOW UP» exhibition by an artist from Severodvinsk Alexander Kabin. The exhibition features painting works by Alexander Kabin and his original outlook on the modern daily life.

«Blow up», the project by Alexander Kabin, shows a series of sketches on the topic of everyday life.

The title immediately refers to the Oscar-nominated film by Michelangelo Antonioni “Blow-up”. The artist grabs the everyday life themed footage from the movie and extrudes the indicative details revealing them to the audience sometimes unexpectedly and sometimes intentionally. Every subject is painfully familiar: industrial landscapes in black smog, overruined public buses, and railroad trains, frozen into realities of the Russian North.

The Details of everyday life commonness suddenly look blanketed in a veil of romance, nostalgia of Soviet childhood, and post-Soviet adolescence of the regions of our country.

Project coordinator: Maria Turkina

The exhibition will run from 26 September to 27 October.
